

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Recently retired, after spending several years working with his brother to manufacture their crane company into an market leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could swiftly and safely elevate individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a partnership with two friends and acquired a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into existing designs.

JLG forklifts have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the company proudly continues to expand itself into a range of markets globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer environment.
